

One platform for the pursuit of justice

Propel your investigations forward with a revolutionary platform that empowers you to close cases faster and redefine what's possible in the pursuit of justice.

The challenge

While products across the industry offer point solutions that improve elements of the case workflow, agencies are still left with the complex challenges created by wide-scale investigations with endless amounts of digital evidence. Magnet One is a connected end-to-end platform that makes sense of the overwhelming amount of digital data and creates greater efficiency across the entire lifecycle of a digital investigation.

Our solution

Close cases faster by uniting your DFIR tools with one cloud platform

Magnet One is the only digital forensics platform that will unite all your digital forensics solutions across your entire workflow resulting in faster investigations.

The Magnet One Hub: One secure cloud access point for all investigative stakeholders

The Magnet One Hub enables examiners, investigators, prosecutors, and agency leadership to efficiently collaborate, in ways that will save time and money, regardless of their locations

Machine learning and automation synchronize data and strengthen case outcomes

Experience seamless data processing and effortless uploads with our automation technology. With Magnet One, digital evidence flows smoothly across your whole workflow enabling swift analysis and reporting like never before.

Get everyone on the same page with real-time collaboration

Empower your team with real-time visibility into case progress, minimizing communication hurdles and maximizing productivity. Magnet One streamlines your workflows effortlessly and fosters seamless collaboration among examiners, investigators, prosecutors, command staff, and agency leadership.

Unmatched access and extraction of data no matter where it is

Magnet One enables you to get access to the data that you need wherever it is. The variety of data sources—including mobile devices, computers, cloud apps, CCTV & other video footage, and more—means that you need a set of comprehensive tools working together unlocking access to data.

Magnet One for everyone**Magnet One for Leadership**

Magnet One is a powerful platform that enables information-sharing, accountability, and improving effectiveness, that equips agency leadership and command staff with the insight needed to build actionable plans and make decisions that support digital forensics efforts.

- Cost savings from more efficient and less resource intensive investigations
- Improve community & public relations
- Serve justice faster by speeding up case closure

Magnet One for Investigators

Magnet One makes creating and collaborating on cases easier than ever reducing the amount of time Investigators spend waiting for results from the digital forensics lab.

- Reduced time waiting for exam results
- Easily collaborate with DF lab securely from anywhere
- Know where a case is at with status updates

Magnet One for Examiners

Magnet One is an examiner's one-stop shop for all the DFIR tools that they need for every step of an examination from device access all the way through to creating reports.

- Easily share findings with investigators
- Get exposure to evidence from other cases/agencies that can help move a case forward
- Eliminate manual "button pushing" processes

Magnet One for Lab Managers

Magnet One gives DFIR Lab Managers the insight needed to create efficiencies in the DFIR lab that result in faster and more cost-effective investigations.

- Easily assign case work and see case progress across the lab
- Demonstrate value of lab with readily available lab metrics and analytics
- Bring together best-in-class DFIR tools in one platform

Magnet One for Prosecutors

Prosecutors use Magnet One to easily access digital evidence and collaborate on reports giving them the confidence needed to make their case in court and reach settlements quickly.

- Review all your digital evidence together in one intuitive platform
- Ensure evidence integrity and chain of custody are upheld
- Collaborate with examiners and investigators on reports in real-time
