

Take control of your digital media investigations

Griffeye helps you work smarter and more efficiently. The computer does the heavy lifting so you can focus on doing what you do best: assembling clues, analyzing relationships and solving cases.

**One case.
One user.**

For individual investigators in their daily work, Griffeye makes it easy to import, process and review large volumes of images and videos.

Key advantages

Seamless import and export

Import everything from CCTV to native forensic image formats and start analyzing them straight away.

Robust image and video hashing

Save valuable time and energy by pre-categorizing known data and stacking duplicates.

Face detection and recognition

Detect and recognize faces in images and videos using technology applied to mass volume and "real world" (i.e. uncontrolled) imagery.

Group and search metadata

Leap ahead in your analysis by correlating metadata to open sources on the internet.

Advanced analysis

Bring critical clues to the surface faster with analysis algorithms for filtering, sorting and searching.

Customized reporting

Cut down on your admin work with handy functions for detailed and fully customized reporting.

Open API

Use the 3rd party apps you need to crack the case with the ability to add plug-ins through the API.

Get started with ease

Intuitive and easy-to-use from the start, the user interface enables you to quickly and easily categorize, prioritize and review digital media.

Included resources

Griffeye Brain (AI)

Brain runs automatically in the background during import and scans through previously unseen footage to detect and flag relevant material, including CSAM and various objects.

Griffeye Intelligence Database (GID)

Working in Griffeye, you have access to the Griffeye Intelligence Database (GID) to seamlessly share intelligence with other investigators — both within and across units.

Griffeye Forensic Market

An extensive digital marketplace gives you access to various valuable apps and add-ons, allowing you to add new functionality as your needs change.
